

# Friday Facts

November 11, 2022

## Free Data Breach Scan

The Statista Research Department reported that "In the first half of 2022, the number of data compromises in the United States came in at a total of 817 cases. Meanwhile, over the course of the same time, over 53 million individuals were affected by data compromises, which include data breaches, data leakage, and data exposure."

Stay worry-free by running a free ID breach scan provided through REALiving.

- Instant results on whether an email address has been breached
- Verify what personal information may be connected
- Check multiple email addresses for compromised data

Get started right now by scanning the QR code with your phone to be taken to

CLC's Breach Scan Tool. Or visit <https://clidprotect.net/scan/trial/1> on your computer.

Entering my personal email, I received an immediate Data Breach Report that included the name of the breached service, the date, and if it was sensitive information where I might want to take further steps. In my case, two apps (a graphic design tool and a health and wellness services) had breaches that impacted their subscribers. Lucky for me, there was no sensitive information that was accessed.

Breathe easier by taking one simple step to check your status. If you think you may need more legal help, access your free EAP benefits through REALiving's 24/7 Call Center.

## ID Protection

Scan with your  
camera phone
