

Welcome to the 2019-2020 school year!

As with any journey, a destination must be chosen and then a route must be mapped. High school is a journey in its own right, with carefully chosen classes becoming the route to the desired destination - a high school diploma. *Again this year we have combined the Cardinal Heights Course Guide with the High School Course Guide in order to better educate students and parents about their four-year plan to graduation.* Whether students dream of becoming doctors or artists, engineers or business owners, it is our mission at both schools to provide appropriate courses that will allow students to reach their dreams.

At Sun Prairie High School and Cardinal Heights Upper Middle School, student choice determines the master schedule. We offer numerous courses that appeal to the many diverse interests of our students while also meeting all core requirements for graduation. The importance of students making informed decisions about their courses cannot be overstated. Student choice determines which courses will actually become a part of the next year's schedule; if students do not show interest in a course, based on minimal student requests, then that course is not offered. Students must give serious thought about their future goals and the courses that will best serve their needs.

Please take the necessary time to review and understand the information contained in this course guide. Each student's high school journey is personalized by the courses that s/he selects. A high school education is only meaningful if it has challenged students, if it has stretched students to new dimensions, if it has inspired students, and if it ultimately helps students find future fulfillment. Choose wisely!

Sincerely,

Keith Nerby
Principal
Sun Prairie High School

Reginald D. McGee
Principal
Cardinal Heights Upper Middle School
