

Sun Prairie West High School EXECUTIVE SUMMARY

PROVIDED BY FINDORFF

2850 Ironwood Drive • Sun Prairie, WI 06.09.2022

Overview

Though summer has just begun for the Sun Prairie Area School District, construction is nearing the end at Sun Prairie West High School with only a few months to go! Sidewalks, landscaping, and final paving are the main activities on site, while interior finishes continue primarily at the Pool, Performing Arts Center (PAC), and PAC Lobby.

The acoustical shell is installed at the PAC Stage with the stage curtain and instrument casework coming next week. Flooring at the aisles in the seating area is underway as well, while wood paneling and ceiling tiles are being completed at the PAC Lobby. Furniture is being delivered to the Library Media Center (LMC) and surrounding corridors on the second floor.

Bleachers are installed in the Auxiliary Gym and Pool Balcony. The pool vessel is being cleaned in preparation for a test fill next week. Rubber flooring is nearly complete in the Art Classrooms and will continue in the Main Commons.

Update

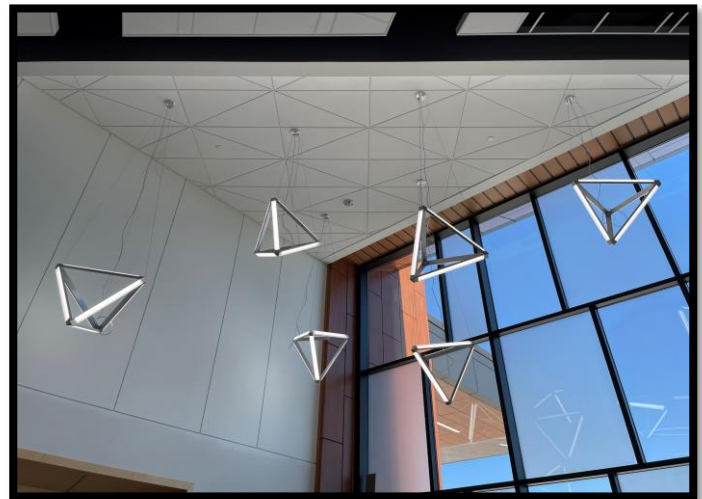

- Acoustical shell in the PAC is installed
- Finishes in the PAC and Lobby are in progress
- Furniture is being delivered for the LMC
- Pouring sidewalks around the building
- Installing benches in the Courtyard
- Bleachers in the Auxiliary Gym and Pool
- Prep for a test fill of the pool vessel

Looking Ahead

- Final paving and striping of roadways and parking lots
- Landscaping around the building and athletic fields
- Flooring in the Main Commons and entryways
- Installing PAC pit filler and instrument storage

The remaining concrete sidewalks and approaches are near the main entrance.

Light fixtures at the PAC Lobby are now hung and lit.

DID YOU KNOW?

SPWHS will feature seven mobile towers and three rows of ceiling panels on the PAC stage to form a full stage acoustical shell. The shell is constructed from 2" acoustical panels consisting of thick fiber honeycomb and maple veneer plywood. The shell will allow performers to hear each other better on stage and allow sound to be projected louder and more clearly to audience members.
